## Outline

Since its foundation 143 years ago, the Egypt Exploration Society (EES) has supported and promoted Egyptian cultural heritage. We have explored more than 150 sites and monuments, published more than 350 volumes of scientific research, and engaged thousands of people across the world.

The EES has embarked on an exciting and ambitious redevelopment project – '[Building the Future](#)' – which was recently awarded a Delivery Phase grant by the National Lottery Heritage Fund. We seek to save our unique collections and make them accessible to everyone by regenerating our central London premises into an accessible and sustainable heritage centre, where our collections will be housed and made the centre of a new activities programme.

We are seeking an experienced Delivery Architect to realise the scheme that was developed by Studio Becoming and granted planning permission by Camden Council on 20<sup>th</sup> March 2024. The Delivery Architect will have responsibility for procuring and overseeing contractors, including a structural engineer.

## Methodology

If invited to tender, we want to hear about how you work, your previous projects, and how you would manage the delivery of our redevelopment project.

The Delivery Architect's primary points of contact within the EES will be the Society's Development Manager, Director, Head of Finance, and other members of staff where necessary or appropriate. The Delivery Architect will also work closely with the appointed Project Manager, Structural Engineer, and contractors.

## Outputs / Deliverables

The Delivery Architect will actualise the approved building plans, helping to ensure the building works keep to budget and prioritise sustainability.

## Contract management

Following selection, and subject to receiving Permission to Start from the Heritage Fund, we anticipate the Delivery Architect will begin work before June 2026. The current deadline for building works to end is May 2028.

The remaining budget for this work is £249,272 (inc. VAT), inclusive of the Delivery Architect's fee and all subcontracted consultants and engineers. We expect to pay the contracted fee by invoice in monthly instalments, though other payment arrangements can be discussed.

## Award criteria

The decision to award the contract will be made according to a range of factors, including cost, prior experience, and ability to deliver the brief on time and to budget.

Tell us about your experience of working with heritage organisations, or how your experience might be transferable to that sector. Candidates with prior experience of National Lottery Heritage Fund projects are encouraged to apply.

To express interest in tendering for this work, please respond by 17:00 (UK) on **Thursday 2<sup>nd</sup> April 2026** with the following information:

- A concise 500-word summary of the work you plan to carry out. This could include a suggested methodology and timeline for delivery against the deadline.
- Indicative costs for your proposed work plan.
- Professional profile with details of previous work and relevant prior experience (please also tell us about any safeguarding policies you have in place).
- References and details of consultants and contractors you have worked with on previous projects (these need not be individuals or organisations who you intend to contract for this project).

Please send expressions of interest, or any questions about the project, to the Society's Development Manager Dr Edward Scrivens at [edward.scrivens@ees.ac.uk](mailto:edward.scrivens@ees.ac.uk).
