‘Wonderful things’

What would you take with you to the afterlife? Draw your most treasured possessions in the tomb below and decorate your burial chamber.

Tutankhamun was buried with thousands of items to help him reach the afterlife including walking sticks, embalming beds, weapons and chariots, games, and even clothes. These artefacts help us to know more about his life and ancient Egyptian culture.

What would the items you have drawn tell archaeologists in the future about you and the time that you lived?
